Protect your designs with TrustedDWG technology

You've invested heavily in developing your designs. Help retain the integrity of your design data throughout the review process with TrustedDWG technology.

Built into AutoCAD LT software, TrustedDWG is the original, most efficient, and most accurate way to store and share design data. TrustedDWG files are created using a complete technology that maintains each element in a drawing, as well as the relationship between elements, with data fidelity.

With more than 30 years of technology wrapped up in every file, TrustedDWG technology helps you preserve and protect your valuable designs.
