Count automates the counting of blocks or objects within a selected area or throughout your entire drawing with a menu to identify errors and navigate through your counted objects.

Push to Autodesk Docs

Generate PDFs faster and with fewer clicks by publishing your CAD drawing sheets as PDFs directly from AutoCAD LT to Autodesk Docs. Plus, you can access your DWG files in Autodesk Docs anywhere with the AutoCAD web app.

Floating windows

Pull away drawing windows to display multiple drawings side by side or on separate monitors without opening another instance of AutoCAD LT. Each window is fully functional for viewing or editing.

Start tab

The AutoCAD LT start tab allows you to easily access files and other helpful content directly from the home screen.

Simplified installation

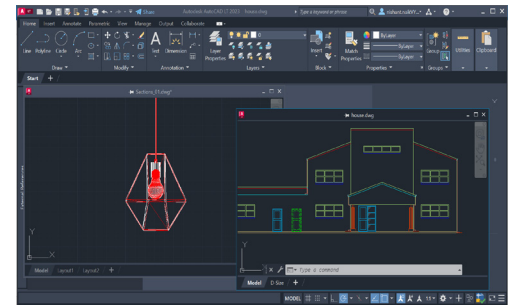

Reduce the amount of time setting up your software with faster and customizable installations. Start working even while the program is being installed.

Performance enhancements

Experience faster performance in AutoCAD LT including when plotting.

Protect your designs with TrustedDWG technology

Help retain the integrity of your design data throughout the review process with TrustedDWG technology. Built into AutoCAD LT software, TrustedDWG is the original, most efficient, and most accurate way to store and share design data. TrustedDWG files maintain each element in a drawing and the relationship between elements with data fidelity.
